**CAV on 12/08/2024**

**Pronounced on 23/09/2024**

**Per Sujit Narayan Prasad, ACJ:**

1. Since the issues involved in the instant batch of writ petitions are identical, as such with the consent of learned counsel for the parties, the same were heard together and are being disposed of by this common order.

**Common Prayer made in the writ petitions:**

2. These writ petitions have been filed, under Article 226 of the Constitution of India, with the common prayer for quashing of different impugned order(s), as contained in different memo numbers and on different dates. For the sake of brevity, the prayer as made in first case of the batch case i.e., W.P.(C) No. 2360 of 2022, is quoted as under:

*(I).For issuance of appropriate writ/order/direction for quashing/setting aside Memo No. 829/M dated 06.05.2022 (Annexure-9) wherein petitioner has been directed to make payment of the amount of differential Royalty, D.M.F.T., Environmental Cess and Income Tax on the sole ground that Stone Boulder excavated from the mines of the petitioner has been transported to a Stone Crusher for production of stone chips, as being wholly illegal, arbitrary and beyond the scope of the Jharkhand Minor Mineral Concession Rules, 2004.*

*(II).For issuance of further appropriate writ/order/direction for quashing/setting aside Notification dated 16<sup>th</sup> September, 2019 (Annexure-4) by which Schedule-2 of the Jharkhand Minor Mineral Concession Rules, 2004 has been amended to the extent a higher rate of royalty @ Rs. 250/- per cubic meter has been prescribed for ‘Boulder, Gravel, Shingle which is used for making chips’.*

*(III).In alternative to prayer (2) above, petitioner prays for issuance of an appropriate writ/order/direction, including writ of declaration, declaring that the rate of royalty fixed @ Rs. 250/- cubic meter in respect of mineral for making stone chips cannot be applied to such mining lessees who are not having Processing Unit/Crusher Plant within their leasehold area.”*

**Facts of the case:**

**3.** Brief facts of the case, as per the pleadings made in the writ petitions, reads as under:

**4.** The petitioners are primarily engaged in the business of mining and have been allotted various mining leases mainly with respect to Stone Boulders within the territory of the State of Jharkhand.

**5.** The State of Jharkhand, in exercise of power conferred under Section 23-C(1) and 23-C(2) of the ‘Mines and Mineral (Development and Regulation) Act, 1957’, framed rule, namely, ‘The Jharkhand Mineral (Prevention of Illegal Mining,

Transportation and Storage) Rules, 2017 [hereinafter referred to as 'Jharkhand Minerals Rules, 2017']. Under the said Rules, the State of Jharkhand provided, *inter alia*, that no transportation or otherwise removal of any mineral from any place would be undertaken without obtaining a Transport Challan duly generated through 'Jharkhand Integrated Mines and Minerals Management System Portal [in short 'JIMMS Portal']', which has been recognized under Rule 2(k) of the Jharkhand Minerals Rules, 2017.

**6.** It is the case of the petitioners that in some of the cases, leases are subsisting whereas in some of the cases the leases have expired. However, the petitioners, who have subsisting mining lease stated to have separately registered under JIMMS Portal.

**7.** Further, the State of Jharkhand, in exercise of power conferred under Section 15 of the Minor Mineral (Development and Regulation) Act, 1957 [in short 'MMDR Act, 1957'] framed a rule, namely, 'Jharkhand Minor Mineral Concessions Rules, 2004' [in short JMMC Rules, 2004] in respect of matters pertaining to minor mineral including levy of royalty.

**8.** It has been stated that under Section 9 (2) of the MMDR Act, there is provision of royalty in respect of mining lease, which says that the holder of a mining lease granted on

or after the commencement of this Act shall pay royalty in respect of any mineral removed or consumed by him or his agent, manager, employee, contractor or sub-lessee from the leased area at rate for the time being specified in the Second Schedule in respect of that mineral.

**9.** The Section 15(3) of the MMDR Act contains enabling provisions enabling the State Government to levy royalty or dead-rent in respect of minor minerals removed or consumed at the rate prescribed for the time being in the Rules framed by the State Government in respect of minor minerals.

**10.** It has been stated that from bare perusal of Section 9(2) read with Section 15(3) of the MMDR Act, it would be evident that the said Act contains enabling provisions towards payment of royalty and the said Sections clearly provide, *inter alia*, that payment of royalty would be made by a holder of mining lease in respect of 'mineral removed or consumed in the leased area' to be specified in the Schedule.

**11.** Further, from bare perusal of provision, as contained under Section 9(2) and 15(3) of the MMDR Act, it is evident that payment of royalty is upon removal of mineral and/or consumption of mineral from the leased area. Thus, the incidence of levy of royalty is at the stage of removal of mineral from the leased area and/or consumption of mineral in the leased area.

**12.** In exercise of power conferred under Section 15 of the MMDR Act, the State of Jharkhand has promulgated ‘Jharkhand Minor Mineral Concessions Rules, 2004’ containing therein rules and regulations of minor minerals including Boulder.

**13.** Rule 29 of the JMMC Rules provides for levy of royalty and Rule 29(1)(kh) of the said Rules provides, *inter alia*, that royalty would be payable as per Schedule 2 of the said Rules. It is stated that original Schedule 2 of the JMMC Rules determined the rate of royalty to be paid and, under the said Schedule 2 royalty was payable at the same rate in respect of Boulder, Gravel, Shingle and/or Boulder, Gravel, Shingle, which is used for making chips.

**14.** The State of Jharkhand vide notification dated 16<sup>th</sup> September, 2019 revised the rate of royalty in Schedule 2 in the following manner:

Sl. No.	Minerals name	Rate of revised ownership (Per Cubic Meter)
1.	Boulder, Gravel, Shingle	132/-
2.	Boulder, Gravel, Shingle, which is used for making chips	250/-

**15.** However, later on, the Deputy Director, Mines in exercise of power conferred under provisions of the JMMC Rules issued a clarification vide letter no. 32 dated 24.03.2022 wherein it was stated that royalty @ Rs. 250/-

per cubic meter would be charged irrespective of the fact that a mining lessee is having crusher unit or not within its mining lease area, if, ultimately, minerals are transported through Transport Challan to a Crusher Unit.

**16.** In the backdrop of aforesaid fact, impugned demand notices were issued to mining lessees stating that mining lessees transported certain quantity of stone boulders from their mining leases through Transport Challans to Crusher Unit have paid royalty @ Rs. 132/- per cubic meter equivalent to 374 cubic ft. whereas rate of royalty payable on such boulders were Rs. 250/- per cubic meter equivalent to 708 cubic feet and, accordingly, difference of Rs. 118/- per cubic meter equivalent to 334 cubic feet of royalty was demanded along with DMFT Charges, Environmental Charges and Income Tax.

**17.** The said notices issued to the petitioners-lessees are the subject matter of instant writ petitions as also the petitioners have questioned the notification dated 16<sup>th</sup> September, 2019 by which Schedule 2 of the Jharkhand Minor Mineral Concessions Rules has been amended to the extent a higher rate of royalty @ Rs. 250/- cubic meter for boulder, gravel, shingle, which is used for making chips, has been charged.

**Arguments on behalf of the Petitioner(s):**

**18.** Mr. Sumeet Gadodia, Learned counsel for the petitioners has submitted that in terms of provisions of Section 15(3) of the MMDR Act read with Rule 29(1)(kh) and 29(4) of the JMMC Rules, 2004 royalty is levied only upon execution and removal of minerals from mining lease area i.e., the incidence of levy of royalty is the extraction and/or removal of minor mineral. In the instant case, the petitioners have removed only 'stone-boulders' from their mining lease, which was leviable to royalty, even as per the amended notification dated 16<sup>th</sup> September, 2019 @ 132/- per cubic, but, instead of that impugned notice has been issued demanding differential royalty from the petitioners on a future event of crushing stone-boulders and converting the same into chips, which is beyond the incidence of levy of royalty under the MMDR Act read with JMMC Rules.

**19.** In support of this limb of argument, learned counsel for the petitioner has relied upon the judgment rendered by Hon'ble Apex Court in the case of ***Tata Steel Ltd. Vs. Union of India & Ors [(2015) 6 SCC 193]***.

**20.** Learned counsel for the petitioner has further submitted that 'minor mineral', as defined under section 3(e) of the MMDR Act reveals that 'minor mineral' means any mineral which the Central Government may by notification in the Official Gazette declares to be 'minor mineral'. Showing the

example of 'Sand', submission has been made that it is for the Central Government to declare a 'minor mineral' and only mineral i.e., Sand has been declared as both a minor mineral and major mineral, depending upon its use for prescribed purpose.

**21.** It has been submitted that in the case at hand, the respondent-State has not come out with a case that stone-boulder has also been notified as a separate minor mineral enabling the State Government to prescribe a separate royalty in respect of the same. Therefore, levy of royalty at different rate of stone-boulders used for making chips is beyond the competence of the State Government.

**22.** Learned counsel for the petitioner has further submitted that the issue as to whether the stone-boulders, which are crushed into stone grits, stone chips and stone dust etc. could result into transformation into a new commodity or would remain as the same mineral, has been answered by Hon'ble Apex Court in the case of ***State of Uttar Pradesh & Ors Vs. Kumaon Crusher [(2018) 14 SCC 53]*** holding that the nature and character of stone remains the same even after crushing the boulder into small stone, stone-chips, stone-dust etc.

**23.** In addition to the aforesaid argument, Mr. Indrajit Sinha, learned counsel for the petitioners has submitted that

issue of 'nature of royalty' fell for consideration before nine-Judge Bench of Hon'ble Supreme Court in the case of ***Mineral Area Development Authority Vs. Steel Authority of India Limited & Others [2024 SCC OnLine 1796]*** wherein by majority of 8:1, it has been held that royalty is not a tax but is the consideration paid to the State Government. In support of his argument, he has relied upon paragraphs 64, 65, 67, 96, 177 and 342 of the said judgment.

**24.** Referring to the judgment rendered in ***Mineral Area Development Authority Vs. Steel Authority of India Limited (supra)***, in particular paragraph 124, submission has been submitted that Section 9 of the MMDR Act statutorily regulates the right of a lessor to receive consideration in the form of royalty from the lessee for removing or carrying away minerals from the leasehold area. The said interpretation will apply with equal force to Section 15(3) of the MMDR Act. Therefore, the royalty is payable by the lessee, which in this case is the petitioners, to the lessor, the State of Jharkhand for removing or carrying away minerals from the leasehold area.

**25.** Thus, the statute as well as the judgment of the Hon'ble Supreme Court unequivocally and unambiguously indicate that royalty is payable when the "mineral" is removed outside the leasehold area or is consumed inside the leasehold area.

The natural corollary of the above is that the royalty is paid on the mineral in the form in which it leaves the leasehold boundaries and not which it possibly can be converted at a later point of time. Therefore, the royalty is payable on mineral in *praesentia* and not in *futuro*.

**26.** It has further been submitted that by virtue of Section 15(3) of the MMDR Act, the State Governments have been empowered to prescribe the rates of royalty, the delegation is specific. Neither expressly not impliedly, the Parliament has conferred on the State Government the power to create a new mineral as a minor mineral or to empower the State Government to defer the point of charging of royalty on the mineral. But, the State Government, by amending Entry 2 of Schedule 2 of the JMMC Rules vide notification dated 16<sup>th</sup> September, 2019 overreaches the restrictions imposed by the Parliament. Therefore, it has not only brought into existence a new mineral in the form of boulder, gravel, shingle, which is used for making chips but has also levy royalty on a product which will come into existence at a later point of time and thereby has deferred the point of chargeability. Therefore, submission has been made that entry 2 of Schedule 2 of the JMMC Rules, which provides for boulder, gravel, shingle, used for making chips, is completely illegal and beyond jurisdiction.

**27.** It has further been submitted that as a matter of fact, the entry 2 of schedule 2 of JMMC Rules is not in consonance with the terms and conditions of the statutory lease. In terms of the lease, the lessor (State) is not entitled to levy royalty on an event which may happen to future after the mineral travels beyond the lease hold area and any inconsistency between the above would have to make a way for the terms and conditions set out in the statutory lease.

**28.** Relying upon the judgment rendered by Hon'ble Apex Court in the case of ***Naresh Chandra Agarwal Vs. Institute of Chartered Accountants of India and others [2024 SCC OnLine 114]*** submission has been made that if a subordinate legislation breaches the limitation imposed by the parent statute then the courts would not hesitate to struck down the same and in the case at hand, applying the said legal principles it is evident that State of Jharkhand has travelled beyond the parent statute i.e., MMDR Act, therefore, the impugned notification to the extent of Entry 2 Schedule 2 of the Jharkhand Minor Mineral Concession Rules, 2004 is liable to be struck down, as the State of Jharkhand has no authority or competence to provide for a separate and higher rate of royalty on boulder, gravel, shingle, which is used for making chips and the same rate of royalty which is payable on boulder, gravel, shingle be charged.

**29.** Mr. Anoop Kumar Mehta, adding to the argument advanced by other counsel, submitted that there cannot be two rates of royalty for the same mineral based upon the use of mineral dispatched as Run of Mine (RoM) from leasehold area in absence of any *intelligible differentia*.

**30.** It has further been submitted that mineral 'boulder' having not been subjected to processing and converting it to chips within the leasehold area, petitioners would only be liable to pay royalty on boulders @ Rs. 132/cum and not at the rate of Rs. 250/Cum.

**31.** It has further been submitted that had the mineral 'boulder' been processed within leasehold area and then dispatched outside the leasehold area after value addition the respondents-State would have been entitled to higher rate of royalty upon conversion of 'boulder' to 'stone chips'.

**32.** Taking the ground of principles of natural justice, submission has been made that before issuance of impugned demand notice, no proper opportunity of hearing has been afforded to the writ petitioners and even the respondents had not considered the replies so submitted by the petitioners.

**33.** It has been submitted that fixation of rates of royalty at different rates in respect of the same mineral at the stage of dispatch or consumption does not appear to be legally justified. By such course of action, the lessor subjected the

writ petitioners-lessee to the dual test of arbitrariness and discrimination while determining different rates of royalty in respect of the same mineral i.e., 'boulder'.

**34.** It has further been submitted that the petitioners, who are mining lessees in respect of minor mineral 'boulder' have been raising invoices to the buyers/consumers irrespective of the nature of use.

**35.** Referring to the judgment rendered by Co-ordinate Division Bench of this Court in the case of ***M/s Master Sunder Das & Sons Vs. The State of Jharkhand & Ors*** in ***WPC No. 601 of 2024***, further submission has been made that the writ petitioners therein were held liable to pay royalty for boulder and not for boulders to be use for stone-chips.

**36.** The other counsel appearing for the petitioners in rest cases have adopted the argument so advanced.

**Submission of the Respondents State**

**37.** Mr. Sachin Kumar, learned AAG-II appearing for the respondents-State of Jharkhand has led the argument in the instant batch of cases.

**38.** Learned counsel for the respondents-State has submitted that Section 15 of the Mines and Minerals (Regulation and Development) Act, 1957, provides power to the State Government to make rules by notification in official gazette for regulating the grant of quarry leases, mining or

other mineral concession, fixing and collection of rent, royalty, fees, dead rent, fines or other charges and the time within which and the manner in which these shall be payable in respect of minor mineral and for purposes connected therewith.

**39.** The State, in exercise of power conferred under Section 15 of the MMDR Act, 1957, made Jharkhand Minor Mineral Concession Rules, 2004 and as per Rule 29(1)(kh) thereof, royalty is chargeable as per rate notified from time to time in Schedule 2 of the Rules.

**40.** It has been submitted that at paragraph 1 of Schedule 2 of the JMMC Rules, 2004, it has been mentioned that the royalty for mineral Boulder, Gravel, Shingle is chargeable at the rate of Rs. 132 per cubic meter w.e.f. 19.09.2019 and royalty for mineral Boulder, Gravel, Shingle, which is used for making chips will be chargeable at the rate of Rs. 250 per cubic meter w.e.f. 19.09.2019.

**41.** So far power of the State Government to amend/revise the rate of royalty is concerned, submission has been made that as per Section 15 of the MMDR Act, 1957 the State Government can amend/revise the royalty rate in three years and the last amendment in the rate of royalty was made in the year 2015 [29.04.2015] and thereafter, after a gap of four years, the schedule rate has been notified vide impugned

Notification No. 1509/M dated 16.09.2019, which cannot be said to be without jurisdiction rather the notification was published as per provision of Section 15 of the MMDR Act, 1957.

**42.** Therefore, the lessee is duty-bound to pay the rent as per the provisions of Rule 29 of the JMMC Rules and conditions stipulated in the lease deed duly executed and registered under Rule 22 of the JMMC Rules, 2004.

**43.** It has been submitted that the some of the petitioners have stone crushers inside the mining lease areas and some have outside, however, in some of the cases, the petitioners have both inside and outside the stone crushers.

**44.** But the only question is that if the petitioner uses/sells the boulders for making chips, irrespective of the fact whether it is made inside or outside the lease hold area rather it depends upon its uses, and accordingly, the petitioner(s) has to pay royalty @ 250/- per cubic meter, as per provisions of Rule 29 of the JMMC Rules and conditions stipulated in the lease deed duly executed and registered under Rule 22 of the JMMC Rules, 2004.

**45.** Further, in some of the cases, the petitioner is presently paying royalty @ Rs. 250/- per cubic meter on boulder, which is used for making chips as per provision of the schedule rate notified vide notification dated 16.09.2019, as would be

evident from Annexure D to the counter affidavit filed in W.P.(C) No. 2360 of 2022.

**46.** So far contention of the petitioners that since they are remediless, as such they have approached this Court by filing series of writ petitions, submission has been made that it is incorrect and misleading statement rather as per the provision of Rule 65(1) of the JMMC Rules, the petitioners can approach the Deputy Director, Mines, of concerned district and file appeal before the appellate authority i.e., the Director of Mines against the assessment/demand raised by the District Mining Officer.

**47.** Further, royalty on the basis of use of mineral is not a new incident and in the case of major minerals (coal) different rate of royalty has been fixed based upon their use. Different price for different consumers (Power Plant, other than power plant) based on use has been notified by the Ministry of Coal, Government of India of same grade of coal raised from mines site, and royalty on coal is chargeable @ 14% of the above notified price of coal.

**48.** Therefore, prescription of two different rates of royalty on the same mineral, on the basis of their use, is not an arbitrary classification.

**49.** In the case of Major Mineral, as per the Second Schedule (Section 9) different rate of royalty has been notified for the same mineral on the basis of their use.

**50.** It has further been submitted that as per Rule 29(1)(kh) the royalty is chargeable as per the rate provided in Schedule 2 of the Rules and hence, while using Boulder for making chips, whether it is being used outside of the lease or inside of the lease, royalty will be chargeable @ Rs. 250 per cubic meter, as per notification dated 16.09.2019.

**51.** Further, in the case at hand, since there is no denial of the fact that the petitioners are not using the boulder for making chips, therefore, it is self-admitted fact that the lessee/petitioner uses the boulder for making chips.

**52.** It has further been submitted that in mining challan generated in the lease, the consignee name and destination is clearly mentioned and in the lease area and it is known about the use of boulder for making chips or not, hence, if boulder is used for making chips royalty is chargeable @ 250/- per cubic meter. It has further been submitted that up-till now, the quantity of mineral applied for generating transporting challan has been provided to the petitioner, and in the light of notification dated 19.09.2019, at present the lessee-petitioners are paying royalty @ Rs.250/- per cubic meter on boulder which is dispatched in crusher for making chips.

**53.** Hence, it is clear that while using Boulder for making chips whether it is being used outside of the lease or inside of the lease, royalty will be chargeable @ Rs. 250 per cubic meter w.e.f. 19.09.2019.

**54.** So far rule making power of the State Government under Section 15 of the Minor Mineral (Development and Regulation) Act, 1957 is concerned, the same has been considered by Hon'ble Apex Court in the case of ***D.K. Trivedi & Sons and Ors versus State of Gujarat and Others.*** [1986 (supp) SCC 20], in particular at paragraph 66 of the aforesaid judgment.

**55.** The issue of principles of estoppels/waiver has also been raised by learned State counsel since some of the petitioners are paying the Royalty amount as per the notification dated 16.09.2019.

**56.** Referring to part V of the lease deed, copy of which was produced in course of hearing, submission has been made by the learned counsel for the State that part V of the lease deed provides that the royalty shall be paid at the rate mentioned from time to time in Schedule 2 of the JMMC Rules, 2004 wherein under the heading 'Rate of Royalty', the rate of royalty has been prescribed @ Rs. 105 and Rs. 65 per cubic meter on building stone including stone chips, boulders road metal, ballast and chilly, stone sets and stone bricks as the

case may be. Therefore, it is evident that rates have been prescribed in the agreement also on different variety of building stone.

**57.** Learned counsel for the State also referred to Rule 41 of the JMMC Rules, 2004 which provides for payment of royalty as provided in the lease deed. Therefore, otherwise also, the petitioners are bound by the terms and conditions of the lease deed and are also bound as per Schedule 2 of the Rule, as amended from time to time.

**58.** It has been contended that the petitioners were aware of these classification and different rates, however, they never challenged this classification, therefore, they have neither any right to wriggle out of the agreements nor they are entitled to challenge the validity of rules, which constitute the terms of the contract/agreement.

**59.** Reference, in this regard has been made to the judgment rendered by Hon'ble Apex Court in the case of ***State of Orissa Vs. Narain Prasad & ors [(1996) 5 SCC 740]***, in particular paragraph 36, wherein it has been observed that if any licensees having entered into agreements voluntarily, containing the conditions aforesaid and having done the business under the licences obtained by them, cannot be allowed to either wriggle out of the agreements nor

can they be allowed to challenge the validity of the Rules which constitute the terms of the contract.

**60.** In this regard, further reference has been made to the recent judgment rendered by Hon'ble Apex Court in the case of ***Mineral Area Development Authority Vs. M/s Steel Authority of India Limited & (supra)***, in particular paragraph 331, 342(a), 342(b).

**61.** In view of aforesaid facts, submission has been made the demand notice served upon the petitioners requires no interference by this Court as the same has been issued with the due competence of the State Government.

### **Analysis**

**62.** This Court having heard learned counsel for the parties, perused the documents available on record, as also the relevant Rules/Act, is of the view that following issues are required to be answered for adjudication of the *lis*:

### **Issues framed:**

***I.*** *Whether levy of royalty at different rate for stone-boulders used for making chips is beyond the competence of the State Government?*

***II.*** *Whether the State Government, by amending Entry 2 of Schedule 2 of the JMMC Rules vide notification dated 16<sup>th</sup> September, 2019 overreaches the restrictions imposed upon by the Parliament?*

**III.** *Whether the State of Jharkhand has authority or competence to provide for a separate rate of royalty on boulder, gravel, shingle, which is used for making chips?*

**IV.** *Whether, as per Section 9(2) and 15(3) of the MMDR Act, the incidence of levy of royalty is at the stage of removal of mineral from the leased area and/or consumption of mineral in the leased area **or** as per its use?*

**V.** *Whether the royalty is to be paid on the mineral in the form in which it leaves the leasehold boundaries and not which it possibly can be converted to at a later point of time?*

**VI.** *Whether prescription of two different rate of royalty on the same mineral, on the basis of their use, is not reasonable classification?*

**VII.** *Whether if the petitioners were aware of these classification and different rates before entering into agreement, at later stage they have right to wriggle out of the agreements or they are entitled to challenge the validity of rules, which constitute the terms of the contract/agreement?*

**63.** Since all the issues are interlinked, the same are being taken up together.

**64.** This Court, before delving upon the issues, considers it fit and proper to refer herein the relevant provisions of law, which are necessary for deciding the issues involved herein.

**65.** The Entry 50 of List II of the Seventh Schedule to the Constitution of India deals with taxes on mineral rights subject to *“any limitations imposed by Parliament by law relating to mineral development.”* So far as regulation of mines and mineral development is concerned, it is enumerated both under the Union List (Entry 54 of List I) and the State List (Entry 23 of List II) of the Seventh Schedule. The entrustment of the subject to the State legislatures under Entry 23 of List II is made subject to the provisions of Entry 54 of List I. Parliament enacted the Mines and Minerals (Development and Regulation) Act, 1957 in exercise of its legislative powers under Article 246 of the Constitution. The MMDR Act is a comprehensive code for the regulation of mines and development of minerals.

**66.** Under Articles 245 and 246(3) of the Constitution of India, the State has the power to make laws in respect to any matters enumerated in List-II of the 7<sup>th</sup> Schedule of the Constitution. Further, the State can make regulations for mines and mineral as per Entry 23.

**67.** By virtue of Section 2 of MMRD Act, 1957, it had been declared that it is expedient in the public interest that the Union should take under its control the regulation of mines and development of mineral to the extent hereinafter provided. The Section imposes an additional restriction on

the ambit of Entry- 54 by limiting it to the provisions of MMRD Act, 1957.

**68.** For ready reference, the provisions of Section (3) of the MMRD Act, is quoted as under:-

*“(ad) “minerals includes all minerals except mineral oils;  
(ae) “mineral concession” means either a reconnaissance permit prospecting licence, mining lease, composite license or a combination of any of these and the expression “concession” shall be construed accordingly;  
(b) “mineral oils” includes natural gas and petroleum;  
(e) “minor minerals” means building stones, gravel, ordinary clay, ordinary sand other than sand used for prescribed purpose and any other mineral which the Central Government may, by notification in the Official Gazette, declare to be a minor mineral;  
(ea) “notified minerals” means any mineral specified in the Fourth Schedule.” Section 4 provides the General Restrictions on undertaking prospecting and mining operations.*

**69.** Section 3(i) of MMRD Act, 1957 the word ‘Mine’ has the same meaning as defined in Mines Act, 1952. However, “minor minerals” is defined under Section 3 (e) of Mines and Minerals (Development and Regulation) Act, 1957.

**70.** Likewise, Section 4A provides for termination of prospecting license or mining leases also places the State Government in an important regulatory role with respect to minerals over which Central Government exercises control.

**71.** Further, Section 9 of the MMDR Act deals with the royalties in respect of mining lease and in Section 9 (2)

thereof there is provision of royalty in respect of mining leases, which says that the holder of a mining lease granted on or after the commencement of this Act shall pay royalty in respect of any mineral removed or consumed by him or his agent, manager, employee, contractor or sub-lessee from the leased area at rate for the time being specified in the Second Schedule in respect of that mineral.

**72.** For ready reference, Section 9 of the MMDR Act is quoted as under:

**9. Royalties in respect of mining leases.—**

*(1) The holder of a mining lease granted before the commencement of this Act shall, notwithstanding anything contained in the instrument of lease or in any law in force at such commencement, pay royalty in respect of any [mineral removed or consumed by him or by his agent, manager, employee, contractor or sub-lessee] from the leased area after such commencement, at the rate for the time being specified in the Second Schedule in respect of that mineral.*

***(2) The holder of a mining lease granted on or after the commencement of this Act shall pay royalty in respect of any [mineral removed or consumed by him or by his agent, manager, employee, contractor or sub-lessee] from the leased area at the rate for the time being specified in the Second Schedule in respect of that mineral.***

*[(2A) The holder of a mining lease, whether granted before or after the commencement of the Mines and Minerals (Regulation and Development) Amendment Act, 1972 (56 of 1972) shall not be liable to pay any royalty in respect of any coal consumed by a workman engaged in a colliery provided that such consumption by the workman does not exceed one-third of a tonne per month.]*

*(3) The Central Government may, by notification in the Official Gazette, amend the Second Schedule so as to enhance or reduce*

*the rate at which royalty shall be payable in respect of any mineral with effect from such date as may be specified in the notification: [Provided that the Central Government shall not enhance the rate of royalty in respect of any mineral more than once during any period of 3 [three years].]*

**73.** Section 9(1) of the Act contemplates the levy of royalty on the mineral consumed by the holder of a mining lease in the leased area. It further contemplates that the holder of a mining lease granted on or after the commencement of this Act shall pay royalty in respect of any [mineral removed or consumed by him or by his agent, manager, employee, contractor or sub-lessee] from the leased area at the rate for the time being specified in the Second Schedule in respect of that mineral.

**74.** The Hon'ble Apex Court in the case of ***National Mineral Development Corpn. Ltd. v. State of M.P., (2004) 6 SCC 281*** has categorically stated that Section 9 is not the beginning and end of the levy of royalty. The royalty has to be quantified for the purpose of levy and that cannot be done unless the provisions of the Second Schedule are taken into consideration.

**75.** For ready reference the relevant paragraph of the aforesaid judgment is being quoted as under:

*“23. Section 9 is not the beginning and end of the levy of royalty. The royalty has to be quantified for purpose of levy and that cannot be done unless the provisions of the Second Schedule are taken into consideration. For the purpose of*

*levying any charge, not only has the charge to be authorised by law, it has also to be computed. The charging provision and the computation provision may be found at one place or at two different places depending on the draftsman's art of drafting and methodology employed. In the latter case, the charging provision and the computation provision, though placed in two parts of the enactment, shall have to be read together as constituting one integrated provision. The charging provision and the computation provision do differ qualitatively. In case of conflict, the computation provision shall give way to the charging provision. In case of doubt or ambiguity the computing provision shall be so interpreted as to act in aid of charging provision. If the two can be read together homogeneously then both shall be given effect to, more so, when it is clear from the computation provision that it is meant to supplement the charging provision and is, on its own, a substantive provision in the sense that but for the computation provision the charging provision alone would not work. The computing provision cannot be treated as mere surplusage or of no significance; what necessarily flows therefrom shall also have to be given effect to.*

**24.** *Applying the abovestated principle, it is clear that Section 9 neither prescribes the rate of royalty nor does it lay down how the royalty shall be computed. The rate of royalty and its computation methodology are to be found in the Second Schedule and therefore the reading of Section 9 which authorises charging of royalty cannot be complete unless what is specified in the Second Schedule is also read as part and parcel of Section 9. “*

**76.** Thus, it is evident that Section 9 of the MMDR Act is in conjunction with the Second Schedule to the MMDR Act. It was held that there is no conflict between the two and that Section 9 of the MMDR Act cannot be read in isolation but

that the Second Schedule to the MMDR Act must be read as a part and parcel of Section 9 of the MMDR Act.

**77.** Further in the case of ***Tata Steel Ltd. v. Union of India, (2015) 6 SCC 193*** while reiterating the aforesaid view the Hon'ble Apex Court has observed that the scheme of the levy of royalty cannot be straitjacketed in view of the variety of minerals to which the MMDR Act applies and for the extraction of which royalty has to be paid.

**78.** For ready reference the relevant paragraph of the aforesaid judgment is being quoted as under:

*“56. It is clear therefore that Section 9 of the MMDR Act has to be read and understood in conjunction with the Second Schedule to the MMDR Act. There is a good reason for it, which is that the scheme of the levy of royalty cannot be straitjacketed in view of the variety of minerals to which the MMDR Act applies and for the extraction of which royalty has to be paid.”*

**79.** It needs to refer herein that the parliament enacted MMRD Act, 1957 wherein it was declared that it is expedient in the public interest that the Union should take under its control the regulation of mines and the development of minerals.

**80.** Whereas, Section 13 of the MMRD Act, 1957 gives power to the Central Government to make Rules in respect of major minerals for regulating the grant of reconnaissance permits,

prospecting licenses and mining leases with respect to minerals.

**81.** Section 13 further empowers the Central Government to make Rules for regulating the grant of mineral concession in respect of minerals and for purposes connected therewith. Section 14 of the Act excludes quarry leases, mining leases and other mineral concessions in respect of minor minerals and for purposes connected therewith from the application of Section 5 to 13 of the Act.

**82.** Section 15 of the MMRD Act gives the same power to the State Government to make rules in respect of minor minerals, and the State Government by way of notification in the official gazette, may make Rules for, regulating the grant of quarry leases and mining leases or other minerals concession in respect to minor minerals and “for purposes connected therewith”.

**83.** The power of Central Government and the State Government are identical in these two Sections i.e. Section 13 and 15 of the MMRD Act, 1957. Section 13, 14 and 15 which forms a group, have to be read together. Section 15 (1) is *pari materia* to Section 13 (1), each conferring power to make rules for ‘regulating’.

**84.** In view of the dictionary meaning of the word ‘regulate’, the power to regulate by rules given by Section 13 (1) and 15

(1) is a power to control, govern, and direct by rules, the grant of prospecting licences and mining leases in respect of minerals other than minor minerals and for purposes connected therewith in the case of Section 13 (1) and the grant of quarry leases, mining leases and other mineral concessions in respect of minor minerals and for purposes connected therewith in the case of Section 15 (1) and to subject such grant to restrictions and to adapt them to the circumstances of the case and the surroundings with reference to which such power is exercised.

**85.** The power to regulate conferred by Section 13 (1) and 15 (1) is not only with respect to the grant of licences and leases mentioned in those sub-sections but is also with respect to “purposes connected therewith”. This phrase gives government a wider power to frame Rules with regard to all tasks which are incidental to the minor minerals.

**86.** A plain reading of Section 15 shows that the State Government is bestowed with the power to make rules, and such rules would provide power, to fix, collect rent, fees and other charges. Further such rules may be made for any other matter, which is to be or may be prescribed.

**87.** Section 15 (1) of Mines and Minerals (Development and Regulation) Act, 1957, provides general power to States to frame rules for regulating the grant of quarry leases and

mining leases and other mineral concession in respect of minor minerals and for purposes connected therewith. However, Section 15(1-A), which was inserted in statute book vide Act No.37 of 1986 w.e.f. 10.02.1987, sets out that the State Government may make rules, without prejudice to generality of powers conferred under Section 15(1).

**88.** Section 15 thereof deals with power to the State Governments to make rules in respect of minor minerals.

**89.** The State of Jharkhand, in exercise of powers conferred under section 15 of the Minor Mineral (Development and Regulation) Act, 1957 [in short ‘MMDR Act, 1957’] framed a rule, namely, ‘Jharkhand Minor Mineral Concessions Rules, 2004’ [in short JMMC Rules, 2004] in respect of matters pertaining to minor mineral including levy of royalty.

**90.** For ready reference, the Rule 15 of the MMDR Act, 1957 is quoted as under:

***15. Power of State Governments to make rules in respect of minor minerals.—***

*(1) The State Government may, by notification in the Official Gazette, make rules for, regulating the grant of [quarry leases, mining leases or other mineral concessions] in respect of minor minerals and for purposes connected therewith.*

*[(1A) In particular and without prejudice to the generality of the foregoing power, such rules may provide for all or any of the following matters, namely:—*

*(a) the person by whom and the manner in which, applications for quarry leases, mining leases or other mineral concessions may be made and the fees to be paid therefor;*

- (b) the time within which, and the form in which, acknowledgement of the receipt of any such applications may be sent;*
- (c) the matters which may be considered where applications in respect of the same land are received within the same day;*
- (d) the terms on which, and the conditions subject to which and the authority by which quarry leases, mining leases or other mineral concessions may be granted or renewed;*
- (e) the procedure for obtaining quarry leases, mining leases or other mineral concessions;*
- (f) the facilities to be afforded by holders of quarry leases, mining leases or other mineral concessions to persons deputed by the Government for the purpose of undertaking research or training in matters relating to mining operations;*
- (g) the fixing and collection of rent, royalty, fees, dead rent, fines or other charges and the time within which and the manner in which these shall be payable;*
- (h) the manner in which rights of third parties may be protected (whether by way of payment of compensation or otherwise) in cases where any such party is prejudicially affected by reason of any prospecting or mining operations;*
- (i) the manner in which rehabilitation of flora and other vegetation such as trees, shrubs and the like destroyed by reason of any quarrying or mining operations shall be made in the same area or in any other area selected by the State Government (whether by way of reimbursement of the cost of rehabilitation or otherwise) by the person holding the quarrying or mining lease;*
- (j) the manner in which and the conditions subject to which, a quarry lease, mining lease or other mineral concession may be transferred;*
- (k) the construction, maintenance and use of roads power transmission lines, tramways, railways, aerial rope ways, pipelines and the making of passage for water for mining purposes on any land comprised in a quarry or mining lease or other mineral concession;*

*(l) the form of registers to be maintained under this Act;*

*(m) the reports and statements to be submitted by holders of quarry or mining leases or other mineral concessions and the authority to which such reports and statements shall be submitted;*

*(n) the period within which and the manner in which and the authority to which applications for revision of any order passed by any authority under these rules may be made, the fees to be paid therefore, and the powers of the revisional authority; and*

*(o) any other matter which is to be, or may be, prescribed.]*

**(2)** *Until rules are made under sub-section (1), any rules made by a state Government regulating the grant of 1 [quarry leases, mining leases or other mineral concessions] in respect of minor minerals which are in force immediately before the commencement of these Act shall continue in force.*

**(3)** *The holder of a mining lease or any other mineral concession granted under any rule made under sub-section (1) shall pay [royalty or dead rent, whichever is more] in respect of minor minerals removed or consumed by him or by his agent, manager, employee, contractor or sub-lessee at the rate prescribed for the time being in the rules framed by the State Government in respect of minor minerals:*

***Provided that the State Government shall not enhance the rate of [royalty or dead rent] in respect of any minor mineral for more than once during any period of 4 [three] years.]***

*[(4) Without prejudice to sub-sections (1), (2) and sub-section (3), the State Government may, by notification, make rules for regulating the provisions of this Act for the following, namely:—*

*(a) the manner in which the District Mineral Foundation shall work for the interest and benefit of persons and areas affected by mining under sub-section (2) of section 9B;*

*(b) the composition and functions of the District Mineral Foundation under sub-section (3) of section 9B; and*

*(c) the amount of payment to be made to the District Mineral Foundation by concession holders of minor minerals under section 15A.]*

**91.** It is evident that the Section 15 of the MMDR Act, confers power upon the State Governments to make rules in respect of minor minerals, as such the State framed rule, namely, 'Jharkhand Minor Mineral Concessions Rules, 2004' in respect of matters pertaining to minor mineral including levy of royalty.

**92.** It is further evident that Rule 15(3) of the MMDR Act contains enabling provisions which enables the State Government to levy royalty or dead-rent in respect of minor minerals removed or consumed at the rate prescribed for the time being in the Rules framed by the State Government in respect of minor minerals.

**93.** It is also stipulated under Section 15(3) of the Act 1957 that the holder of a mining lease or any other mineral concession granted under any rule made under sub-section (1) of Section 15 shall pay [royalty or dead rent, whichever is more] in respect of minor minerals removed or consumed by him or by his agent, manager, employee, contractor or sub-lessee at the rate prescribed for the time being in the rules framed by the State Government in respect of minor minerals.

**94.** Further the proviso to sub-Section 3 of Section 15 of the Act 1957 prescribes the rider upon the state government that the State Government shall not enhance the rate of royalty or dead rent in respect of any minor mineral for more than once during any period of three years.

**95.** Thus, from the aforesaid discussion it is evident that the State Government has power to make rules to enhance the rate of royalty under Section 15(1) read with 15(3) in respect of a minor mineral.

**96.** It is evident from the aforesaid discussion that State, by virtue of the constitutional mandate as well as statutory provision of Act 1957 which has been discussed herein above, has ample power to make the rule for determining the rate of royalty.

**97.** Further, it needs to refer herein the word “mineral” has specifically not been defined in the Act but has been judiciously interpreted. While considering the meaning of the term “mineral”, in ***V.P. Pithupitchai v. Special Secretary to the Govt. of T.N., (2003) 9 SCC 534***, in paras 10 and 12 the Hon'ble Supreme Court held as under: -

**“10. According to this Court's view in State of M.P. v. Mahalaxmi Fabric Mills Ltd.:**

*“Mineral in ordinary and common meaning is a comprehensive term including every description of stone and rock deposit whether containing metallic or non-*

*metallic substance. The word mineral in popular sense means those inorganic constituents of the earth's crust which are commonly obtained by mining or other process for bringing them to the surface for profit.”*

*12. Therefore, a mineral as judicially defined would mean an inorganic substance found either on or in the earth which may be garnered and **exploited for profit.”.***

**98.** On the basis of aforesaid settled proposition of law, it is apparently clear that the minerals can be classified in two types; first are those that are directly extracted, obtained from the earth and others are those minerals that are produced after the extraction through the process of crushing or refinery and these types of minerals are used separately by the company to earn profit in large scale.

**99.** In the instant case, boulders are first mineral that is extracted directly by mining and stone chips are the other minerals that is produced after extraction through the process of crushing and is used separately by the company to earn profit.

**100.** Now coming to the Rule 29 of the JMMC Rules which has been enacted by the State of Jharkhand by the dint of Section 15(3) of the Act 1957 as well as constitutional mandate wherein it has been provided, *inter alia*, that Royalty would be payable as per Schedule 2 of the said Rules.

**101.** For ready reference, the same is quoted as under:

29. लगान एवं स्वामिस्व । जब खनन पट्टा स्वीकृत अथवा नवीकृत किया जाता है-

(क) अनुसूची-1 एवं (क) में उल्लेखित दर से नियत लगान लिया जाएगा।

(ख) अनुसूची-2 में उल्लेखित दर से स्वामिस्व लिया जाएगा।

(ग) लघु खनिज के पट्टेधारियों द्वारा जिला खनिज (न्यास) नियमावली (DMFT) के प्रावधानों के तहत देय राशि का भुगतान करना होगा।

(घ) पट्टेधारी द्वारा उपयोग में लाये गये दखल किए गये भूतल क्षेत्र का भूतल लगान उस दर से देय होगा जो उस क्षेत्र के भू-राजस्व दर से अधिक न हो।

(2) इन नियमों के लागू होने की तिथि से पूर्व में स्वीकृत अथवा नवीकृत खनन पट्टों जिनका अस्तित्व उक्त तिथि को है, पर भी उप नियम (1) का प्रावधान लागू होगा।

(3) यदि खनन पट्टाधारी द्वारा एक से अधिक खनिजों के दोहन की अनुमति एक ही क्षेत्र में दी गयी है तो प्रत्येक खनिज के मामले में अलग-अलग स्वामिस्व अथवा नियत लगान देना होगा। परन्तु यह कि पट्टाधारी को प्रत्येक खनिज की स्थिति में जो भी अधिक राशि होगी, नियत लगान अथवा स्वामिस्व का भुगतान करना होगा।

**102.** For ready reference, relevant portion of Schedule 2 is also quoted as under:

Sl. No.	Minerals name	Rate of revised ownership (Per Cubic Meter)
1.	Boulder, Gravel, Shingle	132/-
2.	Boulder, Gravel, Shingle, which is used for making chips	250/-

**103.** Thus, it is evident that in para-2 of the Schedule 2 of the JMMC Rules, 2004 read with all the amendments till date, it is mentioned that royalty for Mineral Boulder, Gravel, Shingle which is used for making chips will be chargeable at

the rate of Rs. 250 per cubic meter with effect from 19.09.2019.

**104.** As per Rule 29(1) (kh), royalty is chargeable as per rate notified from time to time in Schedule-2 of the Jharkhand Minor Mineral Concession Rules, 2004.

**105.** As per Rule 29(1) (kh) of the JMMC Rules, 2004, the Lessee shall have to pay fixed rent and royalty on quarterly basis and the account of this rent and royalty shall be adjusted on actual basis in such a way that the higher of fixed rent or royalty shall be recovered in any year.

**106.** Now adverting to the facts of the case, it is evident that the State of Jharkhand vide notification dated 16<sup>th</sup> September, 2019 amended the Schedule 2 of the said rules, which is impugned in these batch of writ petitions.

**107.** It is contended by the petitioners that on the basis of amendment in Schedule 2 of the JMMC Rules, 2004, demand notice has been raised whereby the petitioners have been directed to make payment of the amount of differential Royalty, D.M.F.T., Environmental Cases and Income Tax on the sole ground that Stone Boulder excavated from the mines of the petitioner has been transported to a Stone Crusher for production of stone chips, as being wholly illegal, arbitrary and beyond the scope of the Jharkhand Minor Mineral Concession Rules, 2004.

**108.** In the backdrop of aforesaid facts and the relevant provision of law, the first and foremost question which is to be decided is as to:

*“I. Whether the State Government is competent enough to levy royalty at different rate of stone-boulders used for making chips? and;*

*II. Whether the State Government, by amending Entry 2 of Schedule 2 of the JMMC Rules vide notification dated 16<sup>th</sup> September, 2019 overreaches the restrictions imposed upon by the Parliament?”*

**109.** We have discussed in preceding paragraphs that under Section 15 of the MMDR Act, the State Government is empowered to make rules by notification in the official gazette for regulating the grant of quarry leases, mining, or other mineral concession, fixing and collection of rent, royalty, fees, dead rent, fines or other charges and the time within which the manner in which these shall be payable in respect of minor mineral and for purposes connected therewith.

**110.** Further, the State having exclusive power under Article 246 schedule 7 entry list 23 as well as under section 15 MMDR Act, to formulate the Rules and accordingly State have formulated JMMC Rules to regulate the uses and taxes of Minerals, as such there is no *iota* of doubt about the competency of the State in making such Rules.

**111.** It needs to be referred herein that in the case of ***State of Haryana and Anr. vs. Chanan Mal [(1977) 1 SCC 340]*** the constitutional validity of the State enactment framed under the provisions of the MMRD Act, 1957 was under challenge before the Hon'ble Supreme Court. The Constitution Bench of the Hon'ble Apex Court held that subject to the overall supervision of the Central Government, the State Government has a sphere of its own power and can take legally specified action under the Central Act and rules made thereunder. Thus, the whole field of control and regulation under the provisions of the Central Act of 1957 cannot be said to be reserved for the Central Government.

**112.** Further the vires of Section 15(1) of the MMRD Act was challenged in ***D.K. Trivedi and others vs. State of Gujarat and others (supra)*** on the ground that it provided excessive delegation of legislative power to the executive. The Hon'ble Apex Court has held as under:

*“76. To summarize our conclusions : (1) Sub-section (1) of section 15 of the Mines and Minerals (Regulation and Development) Act, 1957, is constitutional and valid and the rule-making power conferred thereunder upon the State Governments does not amount to excessive delegation of legislative power to the executive. (2) There are sufficient guidelines provided in the 1957 Act for the exercise of the rule-making power of the State Governments under section 15(1) of the 1957 Act. These guidelines are to be found in the object for which such power is conferred, namely, "for regulating the grant of quarry leases, mining leases or other mineral*

concessions in respect of minor minerals and for purposes connected therewith; the meaning of the word 'regulating'; the scope of the phrase "for purposes connected therewith"; the illustrative matters set out in sub-section (2) of section and the restrictions and other matters contained in sections 4 to 12 of the 1957 Act. The power to make rules conferred by section 15(1) includes the power to make rules charging dead rent and royalty. The power to make rules under section 15(1) includes the power to amend the rules so made, including the power to amend the rules so as to enhance the rates of royalty and dead rent. A State Government is entitled to amend the rules under section 15(1) enhancing the rates of royalty and dead rent even as regards leases subsisting at the date of such amendment. Sub-section (3) of section 15 does not confer upon the State Governments the power to make rules charging royalty or to enhance the rate of royalty so charged from time to time. The sole repository of the power of the State Governments to make rules and amendments thereto, including amendments enhancing the rates of royalty and dead rent, is sub-section (1) of section 15. A State Government is not required to give an opportunity of a hearing or of making a representation to the lessees who would be affected by any amendments of the rules before making such amendments.

**113.** Thus, in the aforesaid judgment it is evident that the sole repository of the power of the State Governments to make rules and amendments thereto, including amendments enhancing the rates of royalty and dead rent, is sub-section (1) of section 15. The State Government is not required to give an opportunity of hearing or of making a representation to the lessees who would be affected by any amendments of the rules before making such amendments.

**114.** As discussed above, it is clearly given in the Rule under Rule 29 (1) (kh) that royalty is chargeable as per rate notified from time to time in Schedule-2 of the Jharkhand Minor Mineral Concession Rules.

**115.** In the instant case, since, the State Government has power to make rules to enhance the rate of royalty under Section 15(1) read with 15(3) in respect of a minor mineral, the State Government can amend/revise the royalty rate in three years.

**116.** It appears that the last amendment in royalty rate was made in the year 2015 (29.04.2015). Thereafter, after a gap of four years, the schedule rate has been revised vide Notification No.-1509/M, dated 16.09.2019, published in the State Gazette on 19.09.2019, thus the aforesaid notification is within the ambit of the rule as stipulated in the Rules which has been framed by the State as per the power conferred by section 15(3) of the Act 1957 and also as per the mandate of Article 246 Entry 23.

**117.** As per Rule 29(1) (kh), royalty is chargeable as per rate notified from time to time in Schedule-2 of the Jharkhand Minor Mineral Concession Rules, 2004. In para-2 of the Schedule 2 of the JMMC Rules, 2004 read with all the amendments till date, it is mentioned that royalty for Mineral Boulder, Gravel, Shingle which is used for making chips will

be chargeable at the rate of Rs. 250 per cubic meter with effect from 19.09.2019.

**118.** The issues raised by the petitioners regarding differential royalty can be understood only after understanding the actual meaning of minerals. As discussed above the word “mineral” is not defined in the Act; but has been judiciously interpreted by the Hon’ble Apex Court in the case of ***V.P. Pithupitchai v. Special Secretary to the Govt. of T.N., (supra)*** wherein it has been observed that the word mineral in popular sense means those inorganic constituents of the earth's crust which are commonly obtained by mining or other process for bringing them to the surface for profit. Therefore, a mineral as judicially defined would mean an inorganic substance found either on or in the earth which may be garnered and exploited for profit.

**119.** In the instant case, the petitioners by way of beneficiation converted the boulder into chips which has more commercial value than the boulder. Further, the State government by virtue of amendment in schedule 2 of JMMC Rule has only categorized two groups i.e. royalty for Mineral Boulder, Gravel, Shingle which is used for making chips will be chargeable at the rate of Rs. 250 per cubic meter with effect from 19.09.2019 whereas the royalty for Mineral Boulder which is at the rate of Rs. 132 per cubic meter.

**120.** On the basis of aforesaid discussion, it is apparently clear that the minerals can be classified in two types first are those that are directly extracted, obtained from the earth and other are those minerals that are produced after the extraction through the process of crushing or refinery and these types of minerals are used separately by the company to earn profit in large scale.

**121.** In the instant case, boulders are first mineral that is extracted directly by mining; and the stone chips are the other minerals that are produced after extraction through the process of crushing and it is used separately by the company to earn profit and that's why State charges separate royalty on boulder and separate on stone chips. Therefore it is neither arbitrary nor unreasonable, reason being that as per amendment in schedule 2 of JMMC rule the State has charged the differential rate of royalty, which is well under the purview of the statutory provisions, as discussed above.

**122.** The collection of higher rates of royalty i.e. Rs 250/- per cubic meter on removal and transportation of stone boulders through the mechanism of JIMMS Portal especially because the petitioners are removing only stone boulders from their mines and not stone chips and the incidence of levy of royalty is at the stage of removal of mineral from the mines is fair

and reasonable as per Section 9(1) and (2) of the Mines and Mineral Development and Regulation Act, 1957.

**123.** The moot question arises here that the Stone Boulder excavated from the mines of the petitioner which has been beneficiated by the petitioners in to stone chips either inside the lease area or outside lease area upon which different rate of royalty is charged by the State is just, fair and reasonable and come within a 'Reasonable Classification' and thus is in consonance with Article 14 of the Constitution of India and the Mineral Concession Rules, 2004.

**124.** It needs to refer herein that while class legislation is prohibited under Article 14, but the legislature is nonetheless permitted to classify people, objects, and transactions fairly to achieve goals. However, categorization cannot be "arbitrary, artificial, or evasive." It must always be based on a distinction that is both just and reasonable in respect of the goal that the legislation is trying to accomplish.

**125.** As per settled position of law that there are two conditions which need to be fulfilled for a reasonable classification: -

A) It should be on the basis of *intelligible differentia*.

B) Rational relation of the *differentia* with the object.

**126.** The reasonable classification is permitted by law on valid grounds as it discriminates one group from another on

the basis of circumstances or characteristics. Therefore, distinction on the basis of reasonable classification is rational and logical, whereas distinction on the basis of reasonable classification or class legislation is improper and violates Article 14 of the Constitution of India. Article 14 forbids hostile discrimination but not reasonable classification. Article 14 certainly applies where equals are treated differently without any reasonable basis.

**127.** The Hon'ble Apex Court in the case of ***Kathi Raning Rawat v. State of Saurashtra, (1952) 1 SCC 215*** has observed that a distinction should be drawn between 'discrimination without reason' and 'discrimination with reason'. The whole doctrine of classification is based on this distinction and on the well-known fact that the circumstances which govern one set of persons or objects may not necessarily be the same as those governing another set of persons or objects, so that the question of unequal treatment does not really arise as between persons governed by different conditions and different sets of circumstances.

**128.** Further, the Hon'ble Apex Court in ***Western U.P. Electric Power & Supply Co. Ltd. v. State of U.P., (1969) 1 SCC 817*** while observing that Article 14 does not operate against rational classification, has held as under:

*“Article 14 of the Constitution ensures equality among equals : its aim is to protect persons similarly placed against discriminatory treatment. It does not however operate against rational classification. A person setting up a grievance of denial of equal treatment by law must establish that between persons similarly circumstanced, some were treated to their prejudice and the differential treatment had no reasonable relation to the object sought to be achieved by the law.”*

**129.** Further, the Hon'ble Apex Court in the case of ***Air India v. Nergesh Meerza, (1981) 4 SCC 335*** has observed that Article 14 forbids hostile discrimination but not reasonable classification and Article 14 certainly applies where equals are treated differently without any reasonable basis.

**130.** Further, as discussed above the State having exclusive power under Article 246 Schedule 7 Entry list 23 as well as under section 15(3) MMDR Act, to formulate the Rules and accordingly, State has formulated JMMC Rules to regulate the uses and taxes of Minerals wherein under Rule 29 (1) (kh) royalty is chargeable as per rate notified from time to time in Schedule-2 of the Jharkhand Minor Mineral Concession Rules.

**131.** Thus, the State is entitled to charge differential royalty on the stone boulder used for making chips whether it is being used outside or inside of the leased area at the rate prescribed under paragraph -2 of the Second Schedule of the Jharkhand Minor Mineral Concession Rules, 2004.

**132.** Therefore, under Rule 29(1)(kh) royalty is chargeable as per rate notified from time to time in Schedule-2 Of the Jharkhand Minor Mineral Concession Rules, 2004 and neither do the rules appear to violate the equality clause as provided under Article 14 of the Constitution of India.

**133.** Thus, the prescription of rate as per schedule 2 by the State is a reasonable classification and is just, fair and reasonable and is a Reasonable Classification within the class and thus in consonance with the ideals and principles of Article 14 of the Constitution and the Jharkhand Mineral Concession Rules, 2004.

**134.** At this juncture this Court would like to refer Rule 41 of the JMMC Rules, 2004 which provides for payment of royalty as provided in the lease deed, therefore, otherwise also, the petitioners are bound by the terms and conditions of the lease deed and are also bound as per Schedule 2 of the Rule, as amended from time to time.

**135.** It requires to refer herein the settled position of law that once the parties have accepted the terms and conditions of lease or any agreement, it binds the parties and there cannot be any breach of terms and conditions.

**136.** Reference in this regard be made to the judgment rendered by Hon'ble Apex Court in the case of ***Tamil Nadu Electricity Board and Another v. N. Raju Reddiar and***

***Another, (1996) 4 SCC 551*** wherein at paragraph 7 it has been held as under :-

*“7. At the outset it must be borne in mind that the agreement between the parties was a written agreement and therefore the parties are bound by the terms and conditions of the agreement. Once a contract is reduced to writing, by operation of Section 91 of the Evidence Act, 1872 it is not open to any of the parties to seek to prove the terms of the contract with reference to some oral or other documentary evidence to find out the intention of the parties. ... ..”*

**137.** Further, the law is well settled that once the terms and conditions of the agreement have been accepted by the parties, it is not available to them to assail the same, reference in this regard be made to the judgment rendered by Hon'ble Apex Court in the case of ***Panna Lal and Others v. State of Rajasthan and Others*** reported in ***(1975) 2 SCC 633*** wherein at paragraph 21 it has been held that the licensee having voluntarily accepted the contract and after having fully exploited to its advantage the contract to the exclusion of other, cannot resile from the contract and cannot challenge the terms either on the ground of inconvenient.

**138.** For ready reference, paragraph 21 of the aforesaid judgment is quoted hereunder as

*“21. The licenses in the present case are contracts between the parties. The licensees voluntarily accepted the contracts. “They fully exploited to their advantage the contracts to the exclusion of others. The High Court rightly said that it was not open to the appellants to resile from*

*the contracts on the ground that the terms of payment were onerous. The reasons given by the High Court were that the licensees accepted the license by excluding their competitors and it would not be open to the licensees to challenge the terms either on the ground of inconvenient consequence of terms or of harshness of terms.”*

**139.** Thus, in the instant case by virtue of Rules, 2004 the parties are bound by the terms and conditions of the lease deed as such both the parties have bounden duty to follow the terms and conditions of the of the lease deed.

**140.** The core issue which has been agitated on behalf of learned counsel for the petitioners is that the notification, which has been issued in the year 2019 i.e., notification dated 16<sup>th</sup> September, 2019 is without jurisdiction reason being that the State is having no authority to come out with such notification in absence of any power delegated by the Central Government or under the authority of the Central Government.

**141.** The said argument is not acceptable to this Court for the reason that Section 15 has been inserted under the MMDR Act, 1957 wherein provision has been made as under Section 15(3) whereby the State Government has been conferred power to make out rules.

**142.** It is not in dispute and it cannot be disputed that the Jharkhand Mine and Minerals concession Rule (JMMC Rule) has been enacted by the State of the Jharkhand under the

authority of Section 15(3) of the MMDR Act, 1957. Under JMMC Rules, 2004, a provision has been made under Rule 29 conferring power upon the State to issue notification regarding the rates of royalty of one or other minor mineral(s).

**143.** The moment the State has come out with a Rule under the authority as conferred under Section 15(3) of the MMDR Act, based upon which the statutory provision has been enacted by virtue of Rule 29 under which the notification dated 16<sup>th</sup> September, 2019 has been issued, therefore, it is incorrect on the part of the writ petitioners to say that the State Government is having no authority to revise the rates of minor minerals.

**144.** If the contention of the petitioner will be accepted then for what purpose the power has been conferred upon the State and further the question would be that what is the meaning of keeping the major minerals under list I under Entry 54 and minor mineral under List II under Entry 23.

**145.** The aforesaid bifurcation of power is the basic structure of the Constitution of India and there cannot be overlapping otherwise, the result would be that in each and every circumstance, the State Government will have to depend upon the Central Government.

**146.** Therefore, the Constitution makers have bifurcated the allocation of power in three lists i.e., List I, List II and List III.

The subject matter of List I is the exclusive domain of Central Government; the subject matter of List II have exclusive domain of State Government whereas on the subject matter mentioned in List III i.e, the Concurrent List, will have power to make rule both by the Central Government and the State Government, depending upon the situation.

**147.** It needs to refer herein that the validity of Rule 29 of 2004 has not been questioned herein. Therefore, once the validity of Rule 29, by which it is provided that royalty will be as per the mandate schedule-2, is accepted then how can it be argued that impugned notification is not as per Rule.

**148.** Accordingly, all the issues framed by this Court are answered.

**149.** The factual aspect can also be considered on the different angles, which is the global concern. The reason for creating DMFT is only for the purpose of creating a fund so as to compensate the loss occurred to the environment due to the mining operation. The mines and minerals are natural resources and the State is the custodian in addition to that it is the accountability and duty of each and every citizen across the world to maintain the environment so as to maintain the sustainable development.

**150.** The issue since is global and as such if an area will be allowed to be affected the balance across the globe will be

affected, which we have seen due to imbalance in the environment.

**151.** The same is the basic underlying object of creation for the purpose of DMFT fund. The concept is that if the natural resources are being utilized then the mines operators are obliged to pay something to the society and for the purpose the concept of royalty has come as also has been taken note of by the Constitution Bench of Hon'ble Apex Court in the case of ***Mineral Area Development Authority & Anr. Vs. M/S Steel Authority of India & Anr. (Supra)***.

**152.** Further, Section 9B of Act 1957 provides for establishment of the District Mineral Foundation ["DMF"] in any district to work for the interest and benefit of persons and areas affected by mining related operations. The purpose of Section 9-B and the object of the DMF is to further the cause of social justice for those affected by mining related operations, such as tribals who may be dislocated or displaced from their habitat. Section 9B(5) provides that the holder of a mining lease shall pay, in addition to the royalty paid under Section 9, an amount which is equivalent to such percentage of the royalty as may be prescribed by the Central Government.

**153.** It needs to refer herein that in exercise of the powers conferred by Section 15(4) and Section 15 A of the Mines and

Minerals (Development and Regulation) Act, 1957 (as amended in 2015), the Government of Jharkhand has made the Jharkhand District Mineral Foundation (Trust) Rules, 2016 and as per Rule 2016, “District Mineral Foundation” means a statutory trust established as a non-profit body by the Government in all districts affected by mining or mining related operations, in accordance with Section 9B of the Act 1957.

**154.** At this juncture this Court would like to discuss the social responsibilities of the companies which has been categorized as “*Corporate Social Responsibility*”. It is a concept where businesses are mandated to integrate social and environmental concerns in their business activities. It has mainly been considered as a moral and normative responsibility that corporates can voluntarily pursue. But, in the event of conflict or serious harm to the environment, animals or people, where corporate irresponsibility is occurring, it is manifestly illogical to leave to the corporation the task of self-regulating.

**155.** This shows that Corporate Social Responsibility as a concept lacks legal accountability for non-performance of social obligations by companies. Therefore, there should be a shift in focus towards legally mandated accountability.

**156.** Thus, we must move from “Corporate Social

Responsibility” to “Corporate Legal Responsibility”. In this regard, we need to reiterate our commitment to climate action and the concrete mandatory steps to be taken even in the case of corporations.

**157.** CSR is envisaged as a commitment to meet its social obligations by playing an active role to improve the quality of life to the communities and stakeholders on a sustainable basis, preferably, in the project area where it is operating. Reference in this regard may be taken from **G. Sundarrajan v. Union of India, (2013) 6 SCC 620** wherein at paragraph 119 the Hon’ble Apex Court has observed as under:

*“119. Sustainable development and corporate social responsibility (CSR) are inseparable twins, integrated into the principles of inter- and intra-generational equity, not merely human-centric, but ecocentric. CSR is much more when the project proponent sets up NPPs, thermal power plants, since every step taken for generation of energy from such hazardous substances, is bound to have some impact on human beings and environment, even though it is marginal. The Department of Public Enterprises (DPE), recently, issued the Comprehensive Guidelines on CSR for Central Public Sector Enterprises, which includes Npcil, to create, through the Board resolution, a CSR budget as a specific percentage of net profit of the previous year. CSR is envisaged as a commitment to meet its social obligations by playing an active role to improve the quality of life to the communities and stakeholders on a sustainable basis, preferably, in the project area where it is operating. CSR strategy has to be put in practice in line with the millennium development goals as lodged by the United Nations and adopted by the Government of India in the*

*11th Five-Year Plan i.e. 2007-2012, which could cover the areas of education, health, drinking water/sanitation, environment, solar lighting system, infrastructure for backward areas, community development and social empowerment, promotion of sports and traditional forms of arts and culture, generation of employment opportunities and livelihood to be a part of the national/local initiatives to provide reliefs/rehabilitation in terms of natural disaster, calamities, etc.*

**158.** Further, the role of private companies in environmental protection was more extensively discussed at the UN Conference on Environment and Development in *Rio de Janeiro* in 1992. An action plan was accepted in the form of Agenda 21. The website of the United Nations defines Agenda 21 as a daring program of action calling for new strategies to invest in the future to achieve overall sustainable development in the 21<sup>st</sup> century.

**159.** Agenda 21 suggested that the “industry should incorporate cleaner production policies in its operations and investments, taking also into account its influence on suppliers and consumers”. It was further suggested that “industry and business associations should encourage individual companies to undertake programmes for improved environmental awareness and responsibility at all levels to make these enterprises dedicated to the task of improving”.

**160.** India has always adopted measures in line with its commitment to tackling climate changes. There are catena of

judgments that have shaped the legal landscape surrounding corporate responsibility on climate change in India. The Hon'ble Supreme Court of India has highlighted the duty of corporations to protect the environment and contribute to the remediation of environmental damage caused by their activities. Various judgments have led to the strengthening of environmental regulations, expanded corporate liability for environmental damage, and increased transparency and public participation in environmental decision-making processes.

**161.** In case of environmental damage caused by corporations, the Hon'ble Supreme Court of India has adopted the principles of "polluter pays", "precautionary principle", and "sustainable development". The principle of "Polluters Pays" demands that the financial costs of preventing or remedying damage caused by pollution lies with the undertakings which caused such pollution in the first place. The "Precautionary Principle" mandates action to avert risks that could cause serious and irreversible damage to the environment and human health.

**162.** Furthermore, the Companies Act, 2013 introduced a significant provision, Section 135, as part of its Corporate Social responsibility. This includes initiatives related to environmental sustainability and climate change mitigation.

Corporations are now required to allocate a portion of their profits towards activities that benefits society and the environment, driving investments in projects aimed at addressing climate change.

**163.** Thus, Legal and moral responsibilities should be taken together as a bundle of obligations for businesses to effectively discharge their functions with accountability inevitably linked to moral responsibility.

**164.** This Court in the purport of the aforesaid underlying object and adverting to the factual aspect involved in the present matter, it is admitted that the boulders, which has been taken out by the mines operators admittedly is lesser in cost to that of chips. The petitioners' case is that they extract boulder for which the rate of royalty is less i.e., Rs. 132 per cubic meter but outside the lease-hold area the same is being converted into chips and hence, the royalty which has been earmarked for Chips i.e., @ Rs. 250 per cubic meter is not liable to be paid by one or the other petitioners.

**165.** But this Court is of the view that whether it is inside the leasehold area or outside the leasehold area, when the very concept is pay to the society due to extraction of the mining operation to compensate the nature then it is the obligation on the part of the petitioners to pay the royalty on the basis

of ultimate use of mines product, here it is from boulder to chips.

**166.** In the light of aforesaid discussions and observations made hereinabove, the writ petitions sans merit and accordingly are dismissed.

**167.** Pending Interlocutory Applications, if any, stand dispose of.

**I Agree**
